Its ultimate goal is to promote awareness of heart health to Hong Kong people, and to develop and maintain good practice of cardiovascular medicine by ensuring the highest professional standards of competence and ethical integrity.

The Cardiovascular Interventional Summit 2011 (CIS) was successfully held at the Hong Kong Convention and Exhibition Centre on 19-20 November 2011, it was organized by the Hong Kong College of Cardiology, the Guangdong Provincial Cardiovascular Association and the Southern China Interventional Cardiology Education Net. It was one of the main local and international intervention meetings of 2011. Given the long-term strategic position of Hong Kong as a gateway to China, closer collaboration amongst Hong Kong and China cardiologists will work towards mutual benefit. The College would like to strive for a closer professional relationship with our mainland counterparts. The 14th South China International Congress of Cardiology (SCC) was held from 11-14 April 2012 at International Conference Centre, Dongfang Hotel, Guangzhou. Around 30 HKCC members and spouses joined the delegation of Hong Kong College of Cardiology. The 20th Annual Scientific Congress of the College was held on 4-6 May 2012. It was an excellent occasion to acquaint with cutting-edge knowledge in cardiology and to look ahead to future advances and breakthroughs. To advocate for best practice, education, research and development in resuscitation, the Resuscitation Council of Hong Kong (RCHK) was inaugurated on 26 May 2012, Hong Kong College of Cardiology is one of its eight founding organizations. The 4th Asian Preventive Cardiology and Cardiac Rehabilitation Conference cum 8th Certificate Course in Cardiac Rehabilitation will hold on 1-2 December 2012 and will provide an excellent opportunity for sharing experience on practical issues of preventive cardiology and cardiac rehabilitation in Hong Kong. The CardioRhythm 2013, co-organized by the Chinese Society of Pacing and Electrophysiology and the Hong Kong College of Cardiology will hold on 27-29 September 2013 at the JW Marriott Hotel Hong Kong. Also, 6th Asia Pacific Heart Rhythm Scientific Session (APHRS 2013) will join with CardioRhythm 2013 to form the First Joint Heart Rhythm Meeting of Asia. The scientific sessions will provide an excellent opportunity for participants to remain abreast of the latest developments in the field of heart rhythm management.

Throughout the year, the College has also organized a number of local scientific programmes.

Apart from the scientific programmes, the College is also actively involved in community projects to promote cardiovascular health. The Jump Rope for Heart Program continues its recruitment of school children for promotion of heart health through rope skipping. A number of projects for promotion and study of heart health in the community were also launched. The World Heart Day which is scheduled on 7 October 2012 the yearly climax of our heart health promotion to the general public.

Regarding the training of local cardiology trainees, the College continues its involvement in the Hong Kong Heart Foundation Cardiology Training Fellowship Programme, which provides support for local cardiology trainees to undergo training in world renowned overseas centers.

The diversified and calendar-full activities organized by the College would not be successfully held without the dedication and active participation of its members, support of friends and the contribution of leading practitioners and academics both locally and abroad. Jump Rope for Heart Program (JRFH) (跳繩強心) 2011-2012

The JRFH 2011-2012 was successfully held for the thirteenth year. Around 54,804 students from 110 primary schools, 26 secondary schools and 1 international school (total of 137 schools) participated in the program. Around 820,000 students from 585 schools have joined the program over the past thirteen years.

The annual JRFH Inter-school Rope Skipping Competition is the climax of the year, and it provides an occasion for students to show their talents and to exchange skills with others. This year, 58 primary and 19 secondary school teams participated in the competition on 7 & 14 July 2012 at Lai Chi Kok Park Sports Centre. The competition was divided into 6 groups: 4 groups (A, B, C & novice) for primary schools and 2 groups (A & B) for secondary schools. A.D. & F.D. of Pok Oi Hospital Mrs. CHENG Yam On Millennium School (博愛醫院歷屆總理聯誼會鄭任安夫人千禧小學) and Hong Kong Taoist Association TANG Hin Memorial Secondary School (香港道教聯合會鄧顯紀念中學) were our overall champions in the Division A of the primary and secondary sessions this year.

34 heart health talks, 5 anti-drug talks and 14 anti-drugs exhibitions (co-organized by JRFH & AMS) were conducted at JRFH participating schools in this academic year. Very positive feedback was received.

School visits by expert teams were conducted in 45 schools in this academic year. Students were all amazed by the wonderful performance of our elite skippers and they showed great interest in learning rope skipping.

An elementary instructor certificate course was held on 27 November 2011 (Sunday) to introduce the program to 83 teachers and elite skippers to train them the skills and techniques of teaching rope skipping at schools.

A one-day seminar was held among experienced group leaders of technical judges on 16 October 2011 (Sunday) at the Chinese Young Men's Christian Association of Hong Kong. After evaluation and thorough discussion, the scoring method of the JRFH Inter-school Rope Skipping Competition was fine-tuned so that it would be more easily rated and can save manpower.

Schools that have participated in JRFH for 2 years or more (N=266) were invited to apply for the Jump Rope for Heart School Activity Subsidy Program 2011 to conduct heart health educational or promotional programs at schools. The JRFH Finance Committee perused all 22 applications and approved granting HK\$97,188 to 17 schools.

The 9th World Rope Skipping Championships will be held from 30 July to 9 August 2012 at Tampa, Florida, U.S.A. The JRFH secretariat received 5 sponsorship requests from athletes of the Hong Kong Delegation. The JRFH Finance Committee approved granting HK\$205,000 to sponsor all 41 athletes with applications (@HK\$5,000). Amongst these 41 athletes, 5 have decided not to join the event, thus not received the sponsorship from JRFH.

Heart-safe School Project

Supported by Education Bureau, a new project called “Heart-safe School Project” has been successfully included in the list of projects nominated by the SAR Chief Executive for funding support by The Hong Kong Jockey Club Charities Trust in 2011/12. We aim to develop all schools in Hong Kong into “heart-safe” premises through installation of an automated external defibrillator (AED) and to instill in their students the awareness of maintaining a healthy lifestyle throughout life. We plan to install AED in all primary, secondary and special schools in Hong Kong and train up over 10,000 teachers or school members on CPR and AED for the coming three years.

In view of the success of 2010 World Heart Day Drawing Competition, Hong Kong College of Cardiology has once again hosted the Inter-regional Drawing Competition for ICHHN. The Competition for Year 2011 was divided into 2 groups: Junior Group (age under 12) and Senior Group (age 12-17), with the theme “One World, One Home, One Heart” (全球護心 家家齊心) for both groups. This year, four regions namely Hong Kong, Toronto, Vancouver and Brunei had successfully organized a drawing competition for local students. The drawings of the winners from each region were sent to Hong Kong for the final competition. Vancouver student Tina HUANG and Hong Kong student YEUNG Wun Yan won the Championship of the Junior Group and Senior Group respectively.

7,000 beautiful ICHHN 2012 calendars, with key heart health messages, were printed and distributed to member nations, HKCC Fellows, JRFH participating schools and other related organizations. 12 most outstanding drawings, among many high-standard and creative winning drawings obtained in the past 10 years, were selected and printed on the calendars. Very positive feedback was received.

HKCC, being the founding organization, will actively participate in the future development of ICHHN.

Working Group on Cardiac Computed Tomography

Previously, Hong Kong Cardiologists had to go overseas for Coronary CTA Training but in February 2012, a Coronary CT Angiography Training (Level 2) Course was held at St. Teresa's Hospital in conjunction with the Society of the Cardiac Computed Tomography. Candidates were entitled to the Level 2 certificate after completing the course. It is hoped that such a course will be held regularly for the benefit of doctors in Hong Kong.

Small but relentless technical improvements of coronary computed tomography continue. The radiation involved, once considered prohibitively high, can now be reduced to sub-mSV. Improvement in detector technology, coupled with better software enable much improvement in the quality of the images. Patient with atrial fibrillation, difficulty in holding their breath and patients with high heart rate can all be scanned.

The usefulness of coronary CTA as a screening procedure has effectively reduced unnecessary invasive coronary arteriogram and hence reduce the risk associated with the invasive procedure. The use of coronary CTA in strategic planning of the percutaneous coronary intervention enables the interventional cardiologist to perform the procedure quickly, safely and effectively.

The College will continue to support members who express an interest in coronary Cardiac Computed Tomography. Hong Kong has the best equipment, case load, enthusiasm and peer support for such a venture.
